

AES Engineering Scholarship Application Form

AES Engineering provides comprehensive electrical engineering services for building construction projects. We work in close collaboration with leading architects, designers and clients on projects, large and small. Every engagement is important, but we are particularly proud of our role in helping build stronger communities. Improving the MORNING COMMUTE, helping SICK KIDS get better, or advancing MEDICAL RESEARCH – these are some of the projects that define us, as a firm, and as individuals. Sustainability, innovation and being on the forefront of technology, are integral to our design philosophy. We take great care in applying these values to every project, every step of the way.

Amount of scholarship: \$2500.00 to be paid to a Canadian Post-secondary institution only of the winners choosing with no restriction on program of study.

Student's Name _____

Home School _____ Cell phone _____

Home Address _____

Postal Code _____ Telephone _____ email _____

Please answer the following questions using whatever medium you choose (examples, PowerPoint, YouTube video, Prezi, Artwork, Essay, Illustration, Computer Program, Community Service Project):
