## Knowledge and attitudes towards cannabis

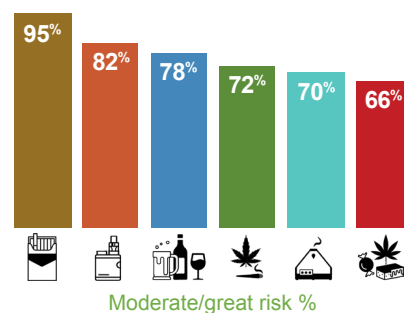

### SOCIAL ACCEPTABILITY

More Canadians (16+) report the **regular use of alcohol** to be **socially acceptable** than regular use of tobacco, e-cigarettes, or cannabis.

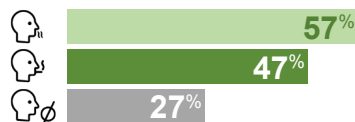

### PERCEIVED RISK OF HARM

Fewer Canadians (16+) perceive **regular cannabis consumption** as having **moderate or great risk of harm**, when compared to regular use of alcohol, tobacco, or e-cigarettes.

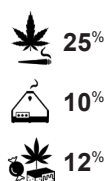

### OBSERVATIONS OF USE IN PUBLIC PLACES

**57%** of Canadians (16+) have **noticed the odour** of cannabis and suspected recent use at the location and **47%** have **noticed someone smoking** what appeared to be cannabis in public in the past 12 months.

**27%** did not notice any use/odour of cannabis in public.

### CANNABIS INSIDE THE HOME

**25%** said that someone had **smoked cannabis inside their home** in the past 12 months.

**71%** said **no one used cannabis inside their home**.

### OPINIONS ON DRIVING AND CANNABIS

**81%** of Canadians (16+) believe cannabis use **impairs one's ability to drive**, compared to 75% in 2017.

This opinion is more common (**87%**) among those who had not used cannabis in the past 12 months, compared to those who had (**61%**).

The majority of Canadians (16+) **do not specify** a time for when it is safe to drive after cannabis use.

**33%** say it **depends** on the person, quantity, and method of use.

**21%** report they **do not know** when it would be safe to drive.

**49%** of Canadians think that it is likely or extremely likely that a person would be caught by police for driving while under the **influence of alcohol**.

**23%** report the same likelihood for being caught driving under the **influence of cannabis**.
